## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 2/13/2006 have been fully considered and are persuasive.

### ***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. The application has been amended as follows:

The Title has been changed to - - Container hermetically sealed with crushable material and reactive multilayer material - -.

*Reasons for Allowance*

4. The following is an examiner's statement of reasons for allowance: the prior art could not alone or in combination anticipate or make obvious a container made of two components with a crushable material as well as a reactive multilayer material between the components to seal them.

The most pertinent prior art, GOEPPNER, discloses a container with deformable material (beads) in the sidewalls. However, GOEPPNER does not show the use of a reactive multilayer material as part of the sealing between the container components, nor would it be obvious to one of ordinary skill in the art at the time the invention was made to add such a feature to the invention of GOEPPNER.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
